

PROJECT TITLE

A Project Report

Submitted by

Student 01 (Reg. No:)

Student 02 (Reg. No:)

Student 03 (Reg. No:)

Student 04 (Reg. No:)

in partial fulfillment for the award of the degree of

BACHELOR OF TECHNOLOGY

IN

COMPUTER SCIENCE & ENGINEERING

(Specialization in Artificial Intelligence and Machine Learning)

Centre for Artificial Intelligence and Machine Learning
Department of Computer Science and Engineering

Faculty of Engineering and Technology
Institute of Technical Education and Research

Siksha 'O' Anusandhan
(Deemed to be University)

Bhubaneswar, Odisha, India

June, 2026

CERTIFICATE

This is to certify that the project report titled “**Project Title**” being submitted by **Student names of Section - XX** to the **Institute of Technical Education and Research, Siksha ‘O’ Anusandhan (Deemed to be University)** , Bhubaneswar for the partial fulfillment for the degree of **Bachelor of Technology in Computer Science and Engineering (Specialization in Artificial Intelligence and Machine Learning)** is a record of original confide work carried out by them under our supervision and guidance. The project work, in my opinion, has reached the requisite standard fulfilling the requirements for the Degree of **Bachelor of Technology**.

The results contained in this project work have not been submitted in part or full to any other University or Institute for the award of any degree or diploma.

NAME OF SUPERVISOR

Designation

Centre for Artificial Intelligence and Machine Learning

Department of Computer Science & Engineering

Faculty of Engineering & Technology, Institute of Technical Education and Research

Siksha ‘O’ Anusandhan (Deemed to be University), Bhubaneswar

ACKNOWLEDGEMENT

Student 1	Reg. No.	_____
Student 2	Reg. No.	_____
Student 3	Reg. No.	_____
Student 4	Reg. No.	_____

Date: _____

Place: _____

DECLARATION

We declare that this written submission represents our ideas in our own words and where other's ideas or words have been included, we have adequately cited and referenced the original sources. We also declare that we have adhered to all principles of academic honesty and integrity and have not misrepresented or fabricated or falsified any idea/fact/source in our submission. We understand that any violation of the above will cause for disciplinary action by the University and can also evoke penal action from the sources which have not been properly cited or from whom proper permission has not been taken when needed.

Place: _____

REPORT APPROVAL

This project report titled “**Projet Title**” submitted by **Student names** is approved for the degree of **Bachelor of Technology in Computer Science and Engineering (Specialization in Artificial Intelligence and Machine Learning)**.

Supervisor

Project Coordinator(s)

Chief Coordinator, CAIML

PREFACE

Contents

List of Figures

List of Tables

Chapter 1

INTRODUCTION

- 1.1 Introduction
- 1.2 Project Overview / Problem Statement
- 1.3 Motivations and Objectives
- 1.4 Scope and Significance of the Work
- 1.5 Organisation of the Report

Chapter 2

REVIEW OF LITERATURE

2.1 Review of Existing Systems / Related Work

2.2 Research Gaps and Problem Identification

Chapter 3

MATERIALS AND METHODS

- 3.1 Dataset Description / / Input Specification**
- 3.2 System Architecture / Block Diagram / UML Diagram / DFD / Use Case Diagram**
- 3.3 Methodology / Algorithm / Model Description**
- 3.4 Tools, Technologies and Frameworks Used**
- 3.5 Performance Metrics / Evaluation Criteria**

Chapter 4

EXPERIMENTATION AND RESULTS / APPLICATION/SYSTEM DESIGN AND OUTPUTS

- 4.1 System Specifications / Experimental Setup**
- 4.2 Parameter Settings / Configuration Details (if applicable)**
- 4.3 Implementation Details / Module Description**
- 4.4 Results and Outputs**
- 4.5 Result Analysis and Validation**

Chapter 5

ETHICAL, SOCIAL & SUSTAINABILITY CONSIDERATIONS

5.1 Ethical Consideration

5.2 Social Impact and Societal Relevance

5.3 Sustainability Consideration

Chapter 6

CONCLUSION AND FUTURE SCOPES

- 6.1 Summary of Findings**
- 6.2 Limitations of the Work**
- 6.3 Scope for Future Enhancements**

Course Outcomes (COs), Program Outcomes (POs) and Program Specific Outcomes (PSOs)

Course Outcomes (COs)

- CO1:** Apply engineering knowledge and computing fundamentals to analyze complex real-world problems, identify requirements, and define appropriate project objectives.
- CO2:** Design and develop end-to-end software or computing solutions using appropriate algorithms, architectures, and modern tools to meet specified constraints.
- CO3:** Conduct investigations, experimentation, and performance evaluation using suitable metrics, datasets, simulations, or prototypes to validate project outcomes.
- CO4:** Demonstrate the ability to function effectively as an individual and as a team member/leader, managing tasks, timelines, and resources in multidisciplinary environments.
- CO5:** Communicate technical ideas, design decisions, and results effectively through well-structured project reports, presentations, and demonstrations.
- CO6:** Recognize and apply professional ethics, societal impact, sustainability considerations, and lifelong learning principles in project development and execution.

Program Outcomes (POs)

- PO1: Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
- PO2: Problem analysis:** Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- PO3: Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet specified needs

with appropriate consideration for public health and safety, and cultural, societal and environmental considerations.

PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of information to provide valid conclusions.

PO5: Modern tool usage: Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society: Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice.

PO7: Environment and sustainability: Understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate knowledge of, and need for, sustainable development.

PO8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice.

PO9: Individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams and in multidisciplinary settings.

PO10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large.

PO11: Project management and finance: Demonstrate knowledge and understanding of engineering and management principles and apply these to one's own work as a member and leader in a team to manage projects in multidisciplinary environments.

Program Specific Outcomes (PSOs)

PSO1: The ability to understand and develop computer programs in the areas related to business intelligence, big data analytics, web design and networking for efficient design of computer-based system of varying complexity.

PSO2: The ability to apply standard practices and strategy in software project development using open ended programming environments to deliver a quality product for business success.

Evidences Linked to CO–PO & PSO Mapping

COs	Mapped POs and PSOs	Evidence in Project Work	
		Description	Section with Evidence
CO1	PO1 (Engineering Knowledge)	1. 2. 3.	- - -
	PO2 (Problem Analysis)	1. 2. 3.	- - -
	PSO1	1. 2. 3.	- - -
CO2	PO3 (Design/Development of Solutions)	1. 2. 3.	- - -
	PO5 (Engineering Tool Usage)	1. 2. 3.	- - -
